

# We're the FreeMind Group.

Since 1999, we've been the leading consulting firm for non-dilutive funding in the life sciences sector.

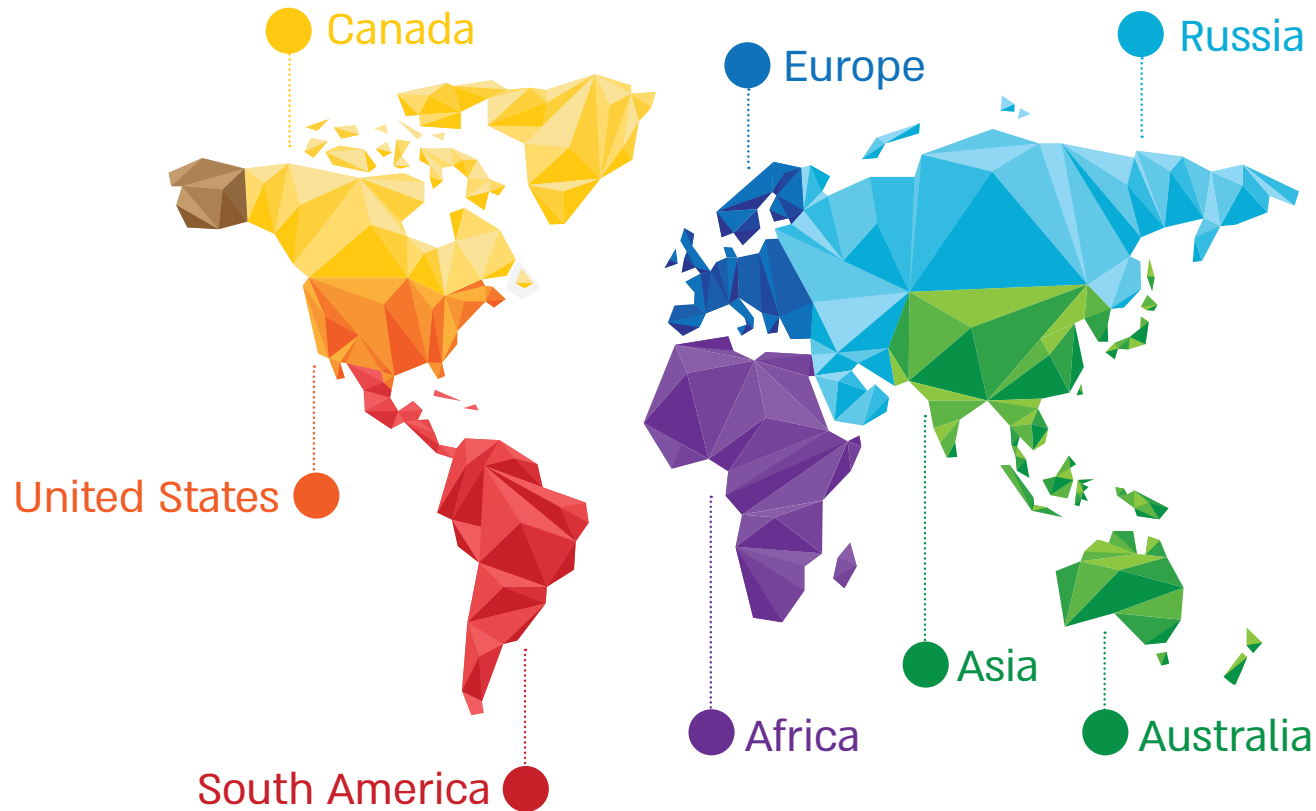

We assist life science organizations worldwide secure non-dilutive funding from US federal agencies and private foundations, and have worked with large pharmaceutical companies, small biotech start-ups, prestigious universities, and private research institutes.

# Great science wins awards.

No matter where in the world you're located.

Our mission is to help you win grants. We develop and execute a long-term, multi-submission granting strategy to maximize your non-dilutive funding potential. We want to make sure you have the best chance of winning grants to get more funding for your groundbreaking research.

# Our Services

 We provide a variety of services to maximize your granting potential.

## Education

Comprehensive educational seminars and presentations tailored to the needs of the target audience.

## Strategic Assessment

A robust, long-term, multi-submission granting strategy for each scientific project.

## Macro Application Strategy

Outline of specific aims, scope of work, budget, collaborators, subcontractors, and consultants required, submission timeline and division of responsibilities.

## Grant Production

A combined writing effort, based on the comprehensive templates drafted by FreeMind project managers. The end product is a scientifically sound application.

## Submission and Follow-Up

Submission of the completed application, monitoring of the review process and assistance with pre-award negotiations.

"Grant writers and editors help with everything that isn't the science, yet can still significantly affect a proposal's chance of success."

Dance, A. (2016). Word Perfect, *Nature*, 540; 471-473

# The Sources of Funding

Over \$50B allocated annually.

There are many sources of non-dilutive funding opportunities for the life sciences – The National Institutes of Health (NIH); The Department of Defense (DoD); Biomedical Advanced Research Development Authority (BARDA); The National Science Foundation (NSF) and more.

These awards range from \$150,000 to \$100,000,000 and fund research across different scientific fields and research phases – from early proof-of-concept programs to late-stage clinical trials. At the FreeMind Group, we are well-acquainted with the funding landscape and the research aims and requirements of the different granting institutes.

# Collaborative, Cloud-Based Work Space

Access FreeMind's custom-built collaborative solution to maximize your granting potential - A single source for all your granting activities.

Using FreeMind's custom-built Microsoft SharePoint solution, safely store all your granting data in the cloud for easy access anywhere, any time on any device.

Follow your team's progress in real time and gain invaluable insight into the status of each project. View division of responsibilities, checklists, progress bars, and integrated Gantt charts.

# Strategic Network

A network of pharma companies seeking their next deal

A network of strategics who are always on the lookout for investment opportunities in the life sciences. These include direct equity investments, mergers, acquisitions, licensing agreements, and more. FreeMind facilitates introductions based on mutual interest.
